I understand this is the e-mail address to send feedback concerning the Microsoft antitrust settlement. As a Windows 98 SE user and resident of Western Washington state, I understand the importance of Microsoft to the economies of the USA and Washington state. However, I believe that it is against the long term interests of the USA and the computer world in general for Microsoft to abuse the monopoly position that they are in. You have asked Microsoft to do some things which would be beneficial if implimented. However, there appear to be no useful sanctions whatsoever if they do not comply. This agreement needs more teeth.
